

The Securion adventures

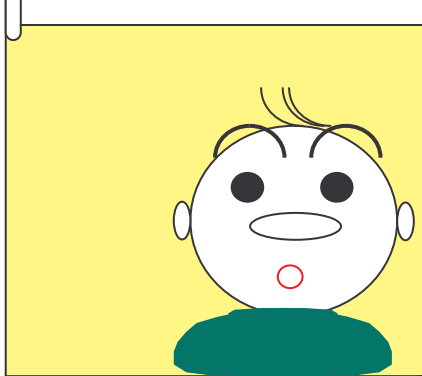

Whole is different from the sum of the parts

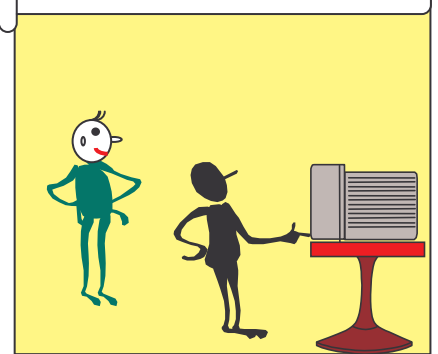

Mr JESAISFAIRE and Securion were at home.

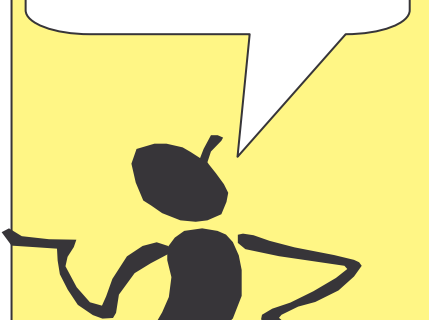

Securion was dumb. He did not know what "football" was!

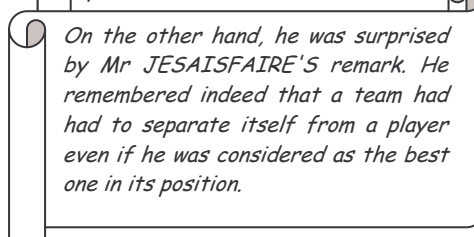

Mr JESAISFAIRE saw the Securion interrogative look. He switched on the television set.

THAT SHOULD BE A GOOD MATCH. BOTH TEAMS SELECTED IN EACH POSITION THE BEST NATIONAL PLAYER!

Securion understood better what "football" was after half an hour being watching the television. In fact he knew this sport since he played almost the same on its planet.

Were there never problems with very good players with their local team but not succeeding in playing good enough with others to constitute an efficient national team?

YES, ONCE A TRAINER DID NOT SELECT A CENTRE FORWARD CONSIDERED BY A GREAT DEAL LIKE THE BEST ONE, HE SAID IT WAS TO HAVE A TEAM ABLE TO SCORE THE MAXIMUM OF GOALS. I HAD DIFFICULTY TO UNDERSTAND BUT FINALLY THE TEAM WON THE WORLD CUP.

In fact, that can be understanding rather easily! It is all the players which make it possible to score goals and not only one, even if it is the player who ends the action of the group by the winning final kick. For the ball must be sent before!!

AND THEREFORE FOR MY SAFETY TEAM THAT MEANS THAT IT IS NOT NECESSARY TO HAVE THE BEST SPECIALISTS FOCUSED ON EACH RISK OF MY COMPANY?

No, in fact it is necessary that they have a very good level naturally. But they also must be able to work together, in order that they constitute A WHOLE, WHICH IS DIFFERENT FROM THE SUM OF THE PARTS.

This involves therefore having a team in which everybody communicates well with somebody else in the team. It means people who "serve the ball" cleverly as it is with a "football" team. That requires a good allocation of the positions and also to give time to people so that they can learn to work together because very often **the way is made while going!**
